

```
static void Main(string[] args)
{
    int number = 944;
    int units = number % 10;
    int hundreds = (number / 100) % 10;
    int dozens = (number / 10) % 10;

    if (units == hundreds && hundreds == dozens)
        Console.WriteLine("True!");
    else
        Console.WriteLine("False!");
}
```
