```csharp
static bool Palindrome(string myString)
{
    int a = 0;
    int b = myString.Length - 1;
    while (a < b)
    {
        if (myString[a] != myString[b])
            return false;
        a++;
        b--;
    }
    return true;
}
```
